

York County Booking

York, PA, United States
EELP / VersaLED

Commissioning services supported the integration of a Blue Ridge Technologies lighting controls system with the building automation system (BAS) at the York County Sheriff's Office. The project utilized EELP and VersaLED fixtures and included system verification, functional testing, and coordination.

The integrated solution connects occupancy sensors, scheduling, and dimming with the BAS, improving energy efficiency, reliability, and centralized control—well suited for the facility's 24/7 operations.
