

Norfolk Southern Executive Train

Altoona, PA, United States

Casey Architectural Lighting / Ohyama Lights

Norfolk Southern's Executive Rail cars feature energy-efficient recessed LED downlights, including both adjustable and fixed options to meet varying illumination needs throughout the interiors. Each fixture utilizes high-performance LEDs while operating at just 5 watts, delivering precise, focused light with exceptional efficiency. A range of available color temperatures allows the lighting to be carefully selected to enhance interior finishes and create a refined, comfortable atmosphere.

Custom wall sconces supplied by Casey Architectural Lighting complement the downlighting, adding architectural character and layered illumination. Surface-mounted LED luminaires provided by Ohyama Lights deliver functional, high-quality lighting in the kitchen area. Together, these LED light sources generate minimal heat, helping maintain a cool and comfortable environment for riders while ensuring consistent, visually appealing light throughout the rail cars.
