

# Tawanka Elementary School

Langhorne, PA, United States

---

---

Independence Lighting collaborated on the lighting installation at Tawanka Elementary School, delivering a solution that blends performance with architectural design. The project features custom-made suspended linear and curved LED luminaires that provide bright, uniform illumination throughout key corridors and shared spaces.

The lighting design enhances visibility and energy efficiency while introducing a clean, modern aesthetic that complements the school's contemporary interior. By integrating form and function, the system supports safe, comfortable daily student movement and creates a welcoming environment for both students and staff. The result is a forward-thinking educational space where lighting plays a key role in both performance and experience.
