

Chestnuthill Township

Brodheadsville, PA, United States
Spring City Electrical

The busy intersection of Routes 209 and 115 in Chestnuthill Township underwent a transformation to enhance safety, visibility, and sustainability. As part of a PennDOT project, Spring City Electrical and Independence Lighting collaborated on new LED lighting, delivering energy-efficient illumination that brightened the area while reducing environmental impact.

The project improved both functionality and aesthetics, creating a safer and more welcoming environment for drivers, pedestrians, and the surrounding community, and reinforced the township's commitment to modern, eco-friendly infrastructure.
