

Lafayette College

Easton, PA, United States
Spring City Electrical

Located in the heart of Easton, Lafayette College is a distinguished liberal arts institution founded in 1826. Known for its blend of historic architecture and contemporary campus spaces, the college has long emphasized academic excellence, engineering innovation, and a strong connection to the surrounding community.

As part of ongoing campus enhancements, decorative site lighting was implemented to complement the college's traditional character while supporting safety, visual comfort, and nighttime identity. The project featured fixtures and poles supplied by Spring City Electrical, selected for their timeless design, durability, and contextual fit within the campus environment.

Together, the lighting elements reinforce pedestrian pathways, gathering areas, and building approaches—delivering a cohesive aesthetic that respects the college's heritage while meeting modern performance expectations.
