

Subaru Park

Chester, PA, United States

Spring City Electrical / LEOTEK / The LED Company

Located along the Delaware River in Chester, Pennsylvania, Subaru Park is an 18,500-seat soccer-specific stadium and home to the Philadelphia Union. Since opening in 2010, the venue has played a key role in the city's waterfront revitalization while delivering a premier fan experience.

As part of ongoing site improvements, Independence Lighting supplied upgraded LED roadway lighting along Reaney Street. The project features lighting from Spring City Electrical and Leotek, improving energy efficiency, visibility, and overall nighttime aesthetics. Decorative string lighting from The LED Company was also incorporated to create a dramatic lighting effect, enhancing the atmosphere and providing a vibrant approach to the stadium for fans and visitors.
