Norfolk Southern Executive Train

Norfolk Southern/Altoona, Pennsylvania, United States | GVA Lighting/Casey Architectural Lighting, LLC/Ohyama Lights

Norfolk Southern's Executive Rail Cars feature GVA's energy efficient DUCAT-IV and KRONA-IV. DUCAT-IV is an adjustable aim recessed downlight and KRONA-IV is a fixed recessed down light. Both products use 4 high power LEDs. Not only is the DUCAT-IV energy efficient (only 5W), also, a variety of available LED color temperatures means that the right light can be chosen to truly bring out the colors inside of the cars. Casey Architectural Lighting supplied the custom wall sconces while Ohyama Lights supplied the surface mounted LED luminaires in the kitchen area. Additionally, the LED Light sources do not generate any heat helping to keep the cars cool and comfortable for riders.
